Switching careers and looking for a position within the Software Engineering field in a company that values my analytical and technical skills and provides scope for updating my knowledge. I seek a company that will help me contribute to its development while concurrently aiding my personal growth.

SKILLS

- Javascript (React, Node.js, Express)
- Python (Flask)
- SQL (PostgreSQL)
- NoSQL (MongoDB)
- CSS (MUI, Tailwind, Bootstrap)
- HTML5
- GitHub

EDUCATION

NJIT (ThriveDX) Software Development Bootcamp
January 2022 - October 2022 Newark, NJ

PROJECTS

Task Master SASS application (MERN stack) www.taskmasterusa.com

- Contributed to an overwhelming majority of the frontend UI
- Implemented user authentication and password hashing and encryption with Bcrypt, JWT, and Validator.
- Utilized "styled-components" to create custom React components. .
- Created a Trello board to allocate work within the team.
- Deployed to AWS using Elastic Beanstalk and Amplify.

Property Management application (MERN stack) www.citruspropmgt.com

- Approved all pull requests and commented on areas of improvement for the other 3 team members.
- Implemented user authentication and password hashing and encryption with Bcrypt, JWT, and JOI.
- Ensured proper functional queries with MongoDB.
- Created a Trello board to allocate work within the team.
- Created a Lucid flowchart to plan the overall applications component flow and organization.

Restaurant Rating application (SSR) david-rest-rant.herokuapp.com

- Utilized Express in Node.js to set up routes for server side rendering of JSX pages of a restaurant review and commenting application with proper CRUD functionality.

WORK EXPERIENCE

Bren Hop Inc DBA IHOP - General Manager

Oceanside, NY
October 2010 - current

- Migrated restaurant software from the default Point of Sales software to Rosnet, which improved overall transparency of all aspects of the business including proper sales projections based on historical data and current comp growth, scheduling integrated in order to monitor all employee activity against current/past business numbers, and improved product usage monitoring and analysis.
- Maintained the restaurant's entire networking system, upgraded hardware to future proof the connectivity, labeled and organized all connections for ease of maintenance and troubleshooting, and ran proper cable lines.
- Oversee the entire business to ensure outstanding and efficient operations to meet quarterly and annual comp goals. Oversee all business expenses, ensure timely payment of invoices, and manage down expenses to ensure profitability. Managed 40+ employees and ensured high employee retention, high employee morale and standards, positive personal atmosphere, and proper training knowledge.
- Formulated employee onboarding and documents organized to comply with labor law needs and compliance.
